

MODULE 1: LET'S CHAT!

Track 1.1

Caller : Hello! Good morning. May I speak to Miss Isyarina, please?

Isyarina : Speaking.

Caller : I'm Nathan. I'm calling from the Career Guidance Society. We are conducting a survey on career paths after SPM. Can you tell me how old are you and are you still schooling?

Isyarina : I'm sixteen years old. Yes, I'm still schooling in Form 4.

Caller : Good. Can you please tell me a little bit about your ambition?

Isyarina : I'm interested in studying Computer Science. Right now, I'm taking Computer Science classes. When I was in Form 1 till Form 3, I took Basic Computer Science.

Caller : So, now in Form 4, you continue the course in Computer Science? Can you please tell me why you choose Computer Science?

Isyarina : I like computers, especially coding and software. When I go to college, I might further my studies in Computer Science. I would like to become a software engineer.

Caller : That's interesting. What would you like to do when you become a software engineer?

Isyarina : I would like to design and develop online games.

Caller : What is your favourite game?

Isyarina : I like PUBG.

Caller : Why?

Isyarina : It's an interesting, interactive and challenging game. You can team up with players from all over the world.

Caller : Can you tell me briefly about PUBG?

Isyarina : PUBG or Player Unknown Battleground is an online multiplayer battle royale game. It's like a war game. It is developed and published by PUBG Corporation, a subsidiary of South Korean video game company, Bluehole. In the game, up to one hundred players parachute onto an island and scavenge for weapons and equipment to kill while avoiding getting killed.

Caller : I see. In your opinion, is playing PUBG bad?

Isyarina : Well, you can allocate a specific period of time for playing the game. Moderation is the keyword.

Caller : Okay. Thank you for your opinion.
